Publisher: Glencoe

Life Science

STANDARDS: 1 in-depth, 3 moderate

USEFUL: 1 extremely, 3 moderately

District	Course	Edition	Standards	Useful	Comments
Corning Union	Life Science	2005	In-Depth	Extremely	None
Grant Joint Union	Life Science	1999	Moderate	Moderately	There are excellent inquiry mini-labs within the book itself, but the included lab manual has only "cookie-cutter" assignments. Book is written with good information at about a 5th-6th grade level
Morongo	Life Science	2002	Moderate	Moderately	It is a pretty good book, but I have a tough time trying to teach students the ways that they can avoid or catch communicable diseases, and it is contradicted (incorrectly) in the text. It is very poorly edited and appears to say that students can contract AIDS from a TOILET SEAT! I am frustrated with their poor phrasing in several sections.
San Juan	Life Science	1999	Moderate	Moderately	None
