Survey results: http://www.edgateway.net/pub/cabap_docs/97

Publisher: Holt

Earth Science

STANDARDS: 3 moderate, 1 limited

USEFUL: 1 extremely, 3 moderately

District	Course	Edition	Standards	Useful	Comments
Sacramento City	Biophysical Year 1 (integrated with Earth Focus)	1994	Limited	Moderately	We are in the process of adopting new textbooks this year
Alum Rock	Earth Science	2001	Moderate	Extremely	None
Perris Union	Earth Science	1998	Moderate	Moderately	There is no specific unit dedicated to CA Geology/ Geography. This is a weakness that I found in EVERY Earth Science text we adopted 6 years ago
Rialto	Earth Science	2001	Moderate	Moderately	The book does not have adequate supplementary materials and there is no California Standards alignment. I find taht that this book does not fit the standards well and I have to supplement it. The book is dumbed down too much as are many of the newer textbooks. We had to do our own allignment
