Survey results: http://www.edgateway.net/pub/cabap_docs/97

Publisher: It's About Time

Integrated Coordinated Science for 21st Century

STANDARDS: 2 moderate, 1 limited

USEFUL: 2 moderately, 1 not

District	Course	Edition	Standards	Useful	Comments
LAUSD	Intercoordinated Science 1	2004	Moderate	Moderately	This textbook covers the CA standards better than others. It is engaging and the students respond to the pedagogy embedded in the text. On a scale of 1 ~ 10, it is an 8
LAUSD	ICS 1	2005	Moderate	Moderately	The reading level exceeds most of my students' abilities.
LAUSD	Integrated Science 1	1 st	Limited	Not	This is simply a compilation of activities from other books by the publisher. State standards are barely covered, and are mentioned sporadically throughout the text. Most of the activities seem good, but do a poor job of teaching the California Standards. This book was mandated throughout LAUSD, but has actually made it more difficult for teachers at my school to teach a standards-driven Integrated Science course, as we feel constrained by the activities and materials that are available.
